FCC-2017-000006	Tracy A. Wellons		10/04/2016	11/02/2016	Closed	All descriptions of use and dual uses of Photoelectric Fire Alarms which appear to have video and audio capabilities with health-harming radio-frequencies being emitted from networked devices at Albany apartments in Northern California. Landlord claims that photoelectric fire alarms do not emit frequency, yet I have detected radio-frequencies being emitted from all 3 fire alarms installed in my 2 bedroom apartment. I purchased a Wireless RF/WIFI Detector to locate wireless cameras and listening devices with frequencies from 20 MHz to 3 GHz, which covers most transmitting devices. It basically sounds an alarm (an audible beeping sound) when it detects a frequency but does not give a specific radio-frequency number. It is sounding the alarm in multiple locations inside and outside my new apartment including but not limited to the photoelectric fire alarms. Wireless RF/WIFI Detector: http://www.harborfreight.com/wireless-camera-rf-detector-95053.html
FCC-2017-000007	Tracy A. Wellons		10/04/2016	11/02/2016	Closed	All information regarding use and dual uses of fire alarm "horns." At three working fire alarms were installed on the ceilings in the kitchen, master bedroom, and the 2nd bdrm. In addition, there were false fire alarms labeled as "Horns" installed on the wall of the master bedroom and just outside of the 2nd bdrm. They do no look like horns nor did they sound any noise when exposed to smoke or heat. They say, "UL 464 Audible Signaling Appliance for Fire Alarm Service" and "ULC S626 Audible Signal Devices for Fire Alarm Systems" on the back. Edwards did make a device like this. It was part of their "Genesis" product line of fire alarm annunciators (or horns). The company has since been purchased by General Electric who still produces the product under the same name and model number. Today, however, several improvements have been added and the product 'look' has been redesigned. The round piece you see is where the noise comes from. It is called a piezo-electric transducer, an electronic part which can be used as a speaker, or a highly sensitive microphone, depending upon how it is hooked up. There's three wires; one black, one blue, and one red wire leading into the round black piezo-electric transducer. Other wires were attached to the back while installed in the wall. I think it might be government installed by the DOD for law enforcement purposes. All the units in all the government subsidized housing complexes have them here in Carlsbad, California. We do have a local FBI branch in Carlsbad which is why the city is so highly policed. However, the police need to acquire a warrant before they can legally tap for a limited period of time (72 hrs), and these devices are more often being used continuously to violate the privacy of law abiding citizens rather than to catch criminals.

Who is utilizing advanced Electromagnetic radiation technology in Apple Valley, California (and Las Vegas, Nevada) for private property and body invasion, harassment, torture, potentially murder, neurological enslavement and robbery, neurological sabotage, unwanted sexual invasion, and thought deprivation? Who has funded either the Ultrasonic technology installation or the Electromagnetic technology installation which is being used for the criminal or civilly liable purposes in Apple Valley, California (and Las Vegas Nevada)? What department, agency, corporation, or country (lie to me about whose committing these crimes and I'll destroy reputations) is responsible for employing those using these systems for criminal or civilly liable purposes in Apple Valley, California (and Las Vegas Nevada)? If you wish to exclude an entire department or agency from legal or rhetorical actions, what are the names of the individual employees responsible for using these systems from criminal or civilly liable purposes?

FCC-2017-000050	Amir Nasr	Morning Consult	10/18/2016	11/16/2016	Closed	Any complaints filed with the FCC over the past week or two regarding news channels covering the sexual assault allegations against Donald Trump and Bill Clinton. I'm curious if anyone was offended and filed with the Commission due to the somewhat graphic nature of some of the stories. I mean this beyond the video released by the Washington Post a few weeks ago, but the several women who have come forward since then alleging Mr. Trump forcibly kissed them or inappropriately touched them, and the several interviews conducted by TV news outlets in that time. I'm also curious about whether anyone filed with the FCC regarding the women who have alleged that Bill Clinton raped or sexually assaulted them, and any coverage associated with those stories. Thank you very much.

FCC-2017-000307	Susan Berlin	Telrite	01/25/2017	02/24/2017	Closed	Please provide copies of all letters sent during the month of January 2017 to wireless Eligible Telecommunications Carriers ("ETCs"), wireless providers of Lifeline service, that had or have pending Notices of Apparent Liability ("NAL"). It is our understanding that these sent letters are a type of form letter designed for use in investigations and not typically used once a case has proceeded to NAL. It is my understanding too that the letters sent do not foreclose further action on an NAL, but merely indicate that no further action is likely at a particular point in time. First choice is to be provided a copy of these letters. If that is problematic, this request can be satisfied with merely providing a list of ETCs in receipt of such a letter during January 2017. If any readily available information exists as to why such ETCs received these letters and/or why other ETCs with similar pending NALs did not, please provide that as well. thank you.

FCC-2017-000365	Carrie Huffaker		02/16/2017	04/05/2017	Closed	The Internet Access Services Reports (Wireline Competition Bureau) contain information on "High-Speed Subscribership in Zip Codes" from 6/30/00 to 6/30/08. However, this information is aggregated to the national level-- "ranked by population density," "ranked by median household income," etc. in each of the reports. Is subscribership information available for individual zip codes? I request disaggregated, micro-level data on high-speed subscribership by zip code for the 6/00-06/08 time period. I have noted that such data is available, by census tract, from 12/08 on (found on the "FCC Form 477 Additional Data" webpage). I am requesting a restricted fee assessment because I represent an educational institution.
FCC-2017-000366	Carrie Huffaker		02/16/2017	04/05/2017	Closed	The "FCC Form 477 Additional Data" webpage provides data on "Zip Codes by Number of Non-ILEC Interconnected VoIP Providers and CLECs," "Zip Codes by Number of High-Speed Service Providers," and "Zip Codes by Number of CLECs" for the 12/00 -06/08 period. However, when the number of providing entities falls into the 1-3 category, the number of providers is simply marked with an asterisk. It is impossible to know whether these zip codes are served by 1, 2, or 3 providers. For each of these three datasets, I request specific data on whether zip codes are served by 1, 2, or 3 providers, for the 12/00-06/08 period. I am requesting a restricted fee assessment because I represent an educational institution.
FCC-2017-000367	Carrie Huffaker		02/16/2017	04/05/2017	Closed	The "FCC Form 477 Additional Data" webpage provides census tract-level data for the 12/08 period up to today. The data I am concerned with are "Providers of Fixed High-Speed Connections," "Providers of Residential Fixed High-Speed Connections," "Providers of Residential Fixed Connections at least 3 Mbps downstream and at least 768 kbps upstream," and "Providers of Mobile High-Speed Connections." When number of providing entities falls into the 1-3 category, the number of providers is simply indicated with "1". It is impossible to know whether these census tracts are served by 1, 2, or 3 providers. For each of these four datasets, I request specific data on whether census tracts are served by 1, 2, or 3 providers, from the 12/08 period up to the latest dataset (12/31/15). I am requesting a restricted fee assessment because I represent an educational institution.

FCC-2017-000402	Joanna L. Fister		02/25/2017	03/29/2017	Closed	I am currently researching the Telecommunications Industry, and I am looking for some data regarding internet services and quality. I found the API available to gather the FCC speed tests by longitude and latitude. However, I am also looking for that data over time, so I was hoping I could get the date of each test too. I do not think that is an option in the API. However, I did see that was a variable that is collected by the FCC. So I was hoping that I could get access to the raw data that would include the test information and the date and location of the test. Also, would the provider the customer is using also be available? Along with internet speeds, I am interested in data on bandwidth that is available by area, year, and provider. Is that available? Does the FCC have any information on any other innovation or new products the providers create and distribute? Thank you, Joanna

FCC-2017-000466	Kel McClanahan	National Security Counselors	03/20/2017	06/01/2017	Closed	To Whom It May Concern: According to the current list of Records Management Services Appraisal Archivists published at https://www.archives.gov/records-mgmt/appraisal/work-group-all.html , Ann Gillette is the Appraisal Archivist assigned to the Federal Communications Commission (“FCC”). This is a request on behalf of my client Keeping Government Beholden (“KGB”) under the Freedom of Information Act (“FOIA”), 5 U.S.C. § 552, et seq., for copies of all email correspondence exchanged between Ann Gillette and any FCC email address since 1 January 2016. If another Appraisal Archivist was assigned to FCC at any point in this time period, please expand the scope of this request to include that person’s email correspondence with FCC as well. You may limit the scope of this request to employees or contractors whose official duties would include interacting with NARA regarding records management issues.KGB is a 501(c)(3) non-profit open government organization dedicated to ensuring that government records are maintained, retained, and disseminated in the most effective and manner allowed by law. More about the organization can be found at its website http://www.kgbusa.org . To that end we are requesting these records as part of a pilot study of twelve agencies to ascertain the degree and nature of their understanding of and compliance with records management directives, especially those involving emails. KGB intends to compare the information released in response to this request with the reports filed by FCC so as to determine how the agency actually executes its records management policies and practices, as opposed to how it reports them. For that reason, we request a public interest fee waiver.
FCC-2017-000467	Kel McClanahan	National Security Counselors	03/20/2017	04/18/2017	Closed	To Whom It May Concern: This is a request on behalf of my client Keeping Government Beholden (“KGB”) under the Freedom of Information Act (“FOIA”), 5 U.S.C. § 552, et seq., for copies of all records documenting or memorializing training given to staff of the Office of the Chair since 1 January 2016 about records management or retention. KGB is a 501(c)(3) non-profit open government organization dedicated to ensuring that government records are maintained, retained, and disseminated in the most effective and manner allowed by law. More about the organization can be found at its website http://www.kgbusa.org . To that end we are requesting these records as part of a pilot study of twelve agencies to ascertain the degree and nature of their understanding of and compliance with records management directives, especially those involving emails. KGB intends to compare the information released in response to this request with the reports filed by the agency so as to determine how the agency actually executes its records management policies and practices, as opposed to how it reports them. There is a significant public interest in agency programs governing retention of electronic records like emails; it was in fact the focus of the NARA Capstone Program and the 2012 Managing Government Records Directive. Accordingly, we maintain that these records, coupled with the other records KGB is requesting as part of this project, will significantly improve public understanding of government activities, and therefore that this request warrants a public interest fee waiver. Additionally, since responsive records should be relatively easy to locate, and since KGB requests that all records be released in electronic form, there should be no assessable fees in the first place. However, to the extent fees may be assessed, KGB should be placed in the “all other” non-commercial fee category.

FCC-2017-000481	David J. Ruess	NEC	03/24/2017	04/21/2017	Closed	Requesting documentation on what the provider of VoIP services are responsible for in terms of E911 reachability. RedSky type solution not available from VoIP provider yet (to my knowledge), support staff troubled by the potential legal considerations with VoIP phones being moved by the customer and if they are to be responsible if 911 responders cannot locate the customer in the event that the VoIP phone has moved. We recently installed DISA VoIP (Avaya) solution at our location. There has been many discussions regarding the lack of a RedSky tracking system to track phone moves. The current security guidance we have is for clients to use Do1x (which works etc. with VoIP). The problem we run into is that our staff feels responsible for locking down the movements of VoIP phones. This requires a change to individual network ports and makes them non-compliant with the Do1x requirements (as well as creating overhead for configuration toggle). Does the AUP or getting signed understanding from the customers with limitations to VoIP phones cover the installation in the event that someone moves a VoIP phone? In other words, is the responsibility to send notice or location updates on moves shifted to the customer who moved it the VoIP phone without a RedSky type tracking system in place? See this link from the FCC: https://www.fcc.gov/consumers/guides/voip-and-911-service

I would like to receive the information in electronic format. As a representative of the news media, I am only required to pay for the direct cost of duplication after the first 100 pages. Through this request, I am gathering information sent to the federal government about the hindering of making electronic health systems interoperable. This information is being sought on behalf of POLITICO for dissemination to the general public. Please waive any applicable fees. Release of the information is in the public interest because it will contribute significantly to public understanding of government operations and activities. If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees. FCC-2017-000491	Ernest M. Dominick		03/28/2017	04/26/2017	Closed	Lately, there has been a national conversation about inclusion in the media and how TV is becoming a more diverse place. But with the emergence of hashtags such as "#OscarsSoWhite" there is obviously some opposition to these claims of rising diversity. To clarify the argument I am requesting all the complaints (emails and physical letters) that the FCC has received in the last 10 years (2007-2017) over a lack or representation. These correspondences can contain any of the following terms: racist, problematic, misrepresentation, diversity, inclusion, stereotypical depiction, whitewashed, casting.

I request a waiver of all costs associated with fulfilling this submission pursuant to 5 U.S.C. § 5 552(a)(4)(A)(iii). Disclosure of the requested records will further the "public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest" of the requester, the Project On Government Oversight (POGO). Specifically, POGO intends to use the requested records to highlight the standards for granting ethics waivers so that it can increase the public's knowledge of ethics policies and provide any recommendations that are necessary to make the ethics waiver system even more fair, just, and accountable. FCC-2017-000548	Paul Maas M. Risenhoover	Robin Hood International Human Rights Legal Defense Fund	04/24/2017	05/23/2017	Closed	Amendment and Appeal of FOIA For the additional reasons stated herein, appeal of the denials of expeditious handling and fee waiver are requested. At present, the agency does not allow members of the public to have any usable information about how to contact and who to contact within the agency to conduct the first amendment right of petition, citizen rulemaking requests, and similar access to e-government. Without prejudice to the appeal, pursuant to 28 USC 1746(2), I affirm, without making an oath, and consistent with my Jewish faith as a Ben Noach, under the penalty of perjury, that I am willing to pay a fee of US\$25 for the search, responsive records, and pdf delivery thereof by email. Also deem this a first amendment petition for redress, as the information sought is information routinely provided AT NO COST to Leadership Directories, Inc., which then resells the same information to the agency AT COST, and the information is statutorily, constitutionally (first amendment petition clause), and by FOIA rules, required to be proactively disclosed by the agency to the public. The US Department of State updates their Organizational Directory and Telephone Directory of agency HQ, local offices, and Key Officer abroad, every week, providing the public with means of access to their public officials. While they do not explicitly state their email address algorithm, it is readily obtainable online (Lastname.FirstnameMiddleInitial@state.gov), so the public can essentially access almost all State Department personnel and exercise their constitutional rights (Slaughterhouse Cases right to protection abroad and on the high seas are part of the "privileges and immunities of national citizenship). An organizational directory or telephone or contact directory should only be deemed responsive if it contains email addresses for organizational units or individual.

FCC-2017-000610	Tony Romm	Recode	05/10/2017	06/23/2017	Closed	This is a request under the Freedom of Information Act. I am seeking all records related to the suspected cyber attack targeting the FCC and its comment system beginning May 8, 2017. On Monday, the FCC's leading data and security official informed reporters that the agency had been subject to "multiple distributed denial-of-service attacks," which was described as an attempt by "external actors to bombard the FCC's comment system with a high amount of traffic to our commercial cloud host." To that end, the records I seek include the following records over the period between May 7 and the date at which this FOIA is processed, no earlier than May 10: —A copy of network logs or other security records, including IP addresses and related metadata, involved in the attack; —A copy of all memos, reports, security analyses or other documents prepared about the incident by the FCC or any of its vendors, partners or other firms, regarding the attack; —A copy of all emails sent from, and received by, FCC Chairman Ajit Pai, involving the incident, as well as any attachments; —Copies of all emails sent and received by Pai's immediate office staff, as well as correspondences sent and received by the FCC's CIO, David Bray. This also includes attachments. In delivering the documents, I would appreciate them in digital form — as an emailed attachment or file uploaded to a cloud service, such as Dropbox. If that is impossible, a mailed CD would be sufficient.
FCC-2017-000611	Gabriella Dunn	Harper's Magazine	05/10/2017	06/08/2017	Closed	I'm writing to request copies of the complaints submitted to the F.C.C. about Stephen Colbert's opening monologue on The Late Show that aired Monday, May 1, 2017. https://www.nytimes.com/2017/05/05/arts/television/fcc-will-review-complaints-about-colbert-joke-chairman-says.html I only need copies of the complaints themselves, rather than the information about the people who submitted the complaints. Please send the complaints electronically to me at north@harpers.org. Please let me know if you have any questions for me, or if you need any further information for this request. Thank you in advance for your help. I look forward to hearing from you soon.
FCC-2017-000612	Brian Sullivan		05/10/2017	06/23/2017	Closed	On Sunday May 7th 2017, concerned citizens took to the FCC website to express their opinions on the matter of internet service providers' regulatory classification. The FCC reported a string of DDoS attacks concurrent with that inflow of legitimate internet traffic on May 8th 2017. I am hereby requesting the server logs of that comment section through FOIA allowances; the particular issue of concern is that there is mounting evidence to suggest foul play on this commenting service. A large number of submitted comments appear to have been automated, containing identical comment text, alphabetical names submitted in chronological order, and falsified street addresses. A growing number of individuals are concerned that a "bot" or "script" carried out this process; if this can be corroborated by the website's server logs, it would constitute a violation of terms and misconduct in using the FCC's commenting service. This issue is urgent given the imminent nature of policy decisions to be made on the matter of classifying internet service providers' regulatory standards.

I have reason to believe such records exist because they are described in a Request for Records Disposition Authority (RRDA) Job No. NI-173-09-1 by the Office of Media Relations of the FCC. 2. Server Configuration Files and Maintenance Records which provide a description and history of changes made on the various web and search servers related to the operation of the web site, and includes system log files which describe events performed on the servers including login attempts and error reports. I have reason to believe such records exist because they are described in a Request for Records Disposition Authority (RRDA) Job No. NI-173-09-1 by the Office of Media Relations of the FCC. In addition to records related to the above timeframe I generally request Software Records related to the ECFS and any external cloud host used by the ECFS which describe the software products used in conjunction with the operation and maintenance of the web site. These records include licensing information, and describe versions and customizations of commercial off-the-shelf products. I have reason to believe such records exist because they are described in a Request for Records Disposition Authority (RRDA) Job No. NI-173-09-1 by the Office of Media Relations of the FCC. In the event that fees cannot be waived, I would be grateful if you would inform me of the total charges in advance of fulfilling the request. I prefer the documents by email or cd-rom if email is not possible.

FCC-2017-000676	JEFFREY A. MITCHELL	LUKAS LAFURIA GUTIERREZ & SACHS LLP	05/24/2017	06/23/2017	Closed	To Whom It Concerns: On behalf of Network Services Solutions ("NSS") and pursuant to the Freedom of Information Act and Federal Communications Commission ("FCC") rules,1 undersigned counsel hereby requests copies of the documents indicated herein. This is a commercial-use request and NSS is willing to pay full direct costs. Please notify undersigned if estimated costs exceed \$500.00. NSS has numerous appeals pending with the Universal Service Administrative Company ("USAC") regarding whether NSS has complied with 47 C.F.R. section 54.607. At issue, among other things, is whether the rural rates charged by NSS reflect "the average of the tariffed and other publicly available rates . . . charged for the same or similar services in that rural area over the same distance as the eligible service by other carriers."2 Notably, the largest source of publicly available "rural rates" is data reported on the FCC Form 466 itself.3 Accordingly, NSS seeks the following documents in the possession of USAC: All Form 466s for USAC approved funding commitments in the Rural Health Care Telecommunications Program (outside of Alaska) for FY 2016. In the alternative, NSS respectfully requests the Wireline Competition Bureau direct USAC to promptly make Forms 466 available to the public through USAC's website in searchable database form (by Form 466 line-item).

FCC-2017-000712	David Goldstein		06/06/2017	TBD	Closed	Under the Freedom of Information Act, 5 U.S.C. subsection 552, I am requesting access to records of all communications between the Federal Communications Commission and the White House, specifically listing the names of the staff members from the White House and FCC in attendance. We request that you provide electronic copies of all records. If they are too voluminous to send via email or Dropbox and we need to pick up a disk, please notify us. If you deny all or any part of this request, please cite each specific exemption you think justifies your refusal to release the information and notify me of appeal procedures available under the law. Please let us know if the records production would result in proposed fees for research and/or copying. If so, McClatchy requests a public interest fee waiver because the material being sought is likely to be used in a newspaper story. We would argue strongly that there is a significant public interest in our reviewing the material being sought because disclosure of the information is likely to contribute significantly to public understanding of the current administration and is not primarily in McClatchy's commercial interest. As the nation's third largest newspaper group with 30 daily newspapers and a news service that serves hundreds of other media outlets, McClatchy easily qualifies as acting in the public interest. If your office contests this view, we would be happy to discuss it with you.

FCC-2017-000757	Emma Best	Muckrock	06/20/2017	07/19/2017	Closed	To Whom It May Concern: This is a request under the Freedom of Information Act. I hereby request the following records: Copies of complaints (specifically television/broadcast complaints) filed on behalf of "Make Orlando Safer Today" or on behalf of "MOST." I am a member of the news media and request classification as such. I am freelance writer who has previously written about the government and its activities for MuckRock, Motherboard, AND Magazine and Glomar Disclosure. My articles have been widely read, with some reaching over 100,000 readers. My work has been further discussed in outlets including the New York Times, the Washington Post, and BBC. As such, as I have a reasonable expectation of publication and my editorial and writing skills are well established. In addition, I discuss and comment on the files online and make them available through the non-profit Internet Archive, disseminating them to a large audience. While my research is not limited to this, a great deal of it, including this, focuses on the activities and attitudes of the government itself. As such, it is not necessary for me to demonstrate the relevance of this particular subject in advance. Additionally, case law states that "proof of the ability to disseminate the released information to a broad cross-section of the public is not required." Judicial Watch, Inc. v. Dept of Justice, 365 F.3d 1108, 1126 (D.C. Cir. 2004); see Carney v. U.S. Dept of Justice, 19 F.3d 807, 814-15 (2d Cir. 1994). Further, courts have held that "qualified because it also had 'firm' plans to 'publish a number of . . . 'document sets'" concerning United States foreign and national security policy. "Under this criteria, as well, I qualify as a member of the news media. Additionally, courts have held that the news media status" focuses on the nature of the requester, not its request.

FCC-2017-000835	John Wing		07/20/2017	08/17/2017	Closed	Requesting computer server logs confirming the Denial of Service attack described below occurring between 12:01 AM EST 5/8/17 and 12:01 AM 5/10/17. There is evidence that the comments posted during this time were done so with American's personal identifiable information obtained through fraud/identity theft. It's in the interest of US citizens for the FCC to release these computer logs to confirm the DDoS attack ----- We caught them red handed -- they claimed 'cyber attack' but we have the uptime reports. We have the connectivity reports (their CDN is Akamai - you can view real time attack data for their network -- if the FCC site was down, a big chunk of the web would have been too). It would have made big news in the IT/networking world if Akamai hiccup'd... since they were able to handle the world's largest DDoS last fall. That got noticed... by, erm, everyone. Network Operations Centers all over the world saw it. Did anyone see the FCC DDoS? crickets There's evidence that the bot is being run on an API -- in other words someone inside the FCC specifically gave access. They have to issue special keys (just like with Reddit!) -- and they're rate limited. They would know who's doing it instantly, because that API isn't available for just anyone: You have to ask for it -- click on the link, it'll show you the form; it asks for name and e-mail. Someone from the FCC said as much -- it was API access, not public-facing. If there was a connectivity issue it wasn't external, it was internal, preventable, and that's why they won't give out the server logs. Because they knew who was doing it, could have stopped it, didn't, and are letting it continue to happen as we speak. They know exactly which comments are being submitted by bots, and who owns them.
FCC-2017-000836	Nate Brucker		07/20/2017	08/17/2017	Closed	Claims by the FCC that a DDoS took their website down during open comment submission regarding internet neutrality need to be re-evaluated. An attack likely was made by calling the FCC's API, a resource that they limit control of. There's even a form on their website by which you can be granted access. Many of the spam comments were posted using harvested personal data from past data breaches. The FCC's claim that they cannot remain transparent and release their server logs, for fear of exposing personal data, is a piece of sad misdirection. That data was obtained fraudulently, and whatever service the FCC authorized to access their API was acting fraudulently. The FCC is aware that their backs are to the wall, and will stand their ground to all media requests to come clean. The head of the FCC is a man who does not share the interests of the American people, but rather the interests of corporations whom he holds closer than his countrymen. I am joining other citizens in requesting an FOIA of FCC server logs during the claimed "DDoS attack" to verify that the FCC has truly remained a transparent, ethical body under the jurisdiction of a former Verizon employee.

FCC-2017-000868	Donald A. Davis		07/28/2017	08/25/2017	Closed	I respectfully request a copy of the documents the FCC received and sent regarding my complaint against Comcast. Comcast denied me service in May 2017 stating I owed them over \$600 for an account in 2012-2013 they said they gave service to someone in Michigan using my name and my social security number. I never lived in Michigan and never authorized anyone to obtain Comcast service in Michigan. Comcast first notified me in May "2017". However, I already had Comcast service in 2014-2016 in Massachusetts and received a refund check from them in 2016. Comcast denied service to me and everyone in my household in May 2017, so they know who I am and know where I live. They said I needed a subpoena to get a copy of the bill they said is mine and want me to pay. They said they want more personal information from me but yet refuse to prove such an account exists. There is fraud in this case and I am investigating whether it is internal to Comcast such as the Shreveport LA Comcast case or if there was really an account. Comcast has not been cooperative and draws the question "why not". I feel as though I am being victimized twice. I respectfully request a waiver for the fees for the research and copying of documents as I am trying to get a law passed to help save others from going through what I am thus saving the FCC time and money by reducing the number of complaints to the FCC and request from the FCC. If such a law is passed, my suggestion should save money and time for other Federal and State agencies as well. Jessica Fahrenholz, Comcast Executive Customer Relations was informed never to call me again regarding this fake Comcast account as I wanted everything documented. Comcast was sent a signed and notarized Affidavit (signed May 26, 2017), that was notarized by a Bank of America Official. However, on July 26, 2017, "someone" from Comcast called me to which I did not answer.

It was the second licensed station in the country. I am specifically looking for how the call letters were selected. What does WRRR stand for? Who selected the letters (the city or the Dept of Comm.)? Who selected W over K? (The east vs west designation was not yet a standard.) Please help me with this missing piece of history for our radio station.

FCC-2017-000946	Michael Basaman		09/07/2017	10/05/2017	Closed	Please provide any and all documentation regarding the development, deployment or use of technology that allows live and recorded public and private sector radio, television and internet streaming content to interact in real time with users without their consent or knowledge. For example, when I flip the television station to a recorded broadcast of Senate proceedings on CSPAN, in the middle of a speech by Harry Reid, I say out loud, in the privacy of my own home, "Ni Hao." Harry Reid interrupts his speech to say "on whose behalf are you addressing this body?" I say "do you want my advice" he says "no". This also includes radio broadcasts and pre-purchased Amazon Instant Video in which I have witnessed Disney cartoon characters use actual profanity to berate my seven year female child. This also includes devices outside of my home, such as when I walk by a television in a convenience store, to have a TV host make lewd comments about my girlfriends or provide commentary during sex. Please disclose the technology in use, to monitor, react to and oppress broadcast consumers.
FCC-2017-000947	Jason Silverstein	New York Daily News	09/07/2017	10/06/2017	Closed	All complaints received by the FCC about news coverage of President Trump, either in general or from a specific station, between January 20 and June 25, 2017 and since August 3. I previously sent in two prior versions of this request, No. 2017-690 and No. 2017-784, but there was some confusion and I did not receive the full files. I only received several files from early 2017 and about 1,400 complaints from June 26 through August 2. I spoke on the phone today with who helped cleared up the confusion. To be clear: I would like to receive "ALL" FCC complaints about Trump news coverage between January 20 and June 25, 2017 and since August 3. I do not need any complaints between June 26 and August 2, since I already received those, and I do not mind receiving duplicates of the few early complaints I received in my first request. I would also like to know, ahead of receiving the complaints, how many complaints there have been about Trump news coverage between January 20 and today, September 7, who has been very helpful in this process, told me to request expedited processing due to the confusion, so I have done so here. Thank you very much.

FCC-2018-000050	Dennis L. Edinger	Amateur Radio Station	10/19/2017	11/20/2017	Closed	Approximately late April, 2013, FCC agent performed a radio frequency (RFI) survey around my neighborhood in CA. This visit was in response to my ongoing complaint about excessive RFI emissions from Southern California's Electric utility poles and/or other SCE field equipment. This RFI was and is severely prohibiting me from enjoying the privileges of using my licensed radio station (formerly), said he was unable to provide me with his survey report and also said it would be very difficult to obtain his report by other means. I do not understand his remarks about the inability to view his report. Additionally, I was surprised and unhappy to detect a degree sympathy for Southern California Edison. I wish to invoke my FOIA rights to obtain report via this (FCC) FOIA process.

Kindly make available a copy of document(s) that represent FCC's risk management efforts in this context. I am grateful to the Office of Engineering and Technology at the FCC who exercised intellectual honesty in the first week of June 2015 concerning my query on whether FCC has oversight on intentional misuse of powerful unidirectional RF transmitters used in the mobile/microwave communication backhaul infrastructure. In response via oelinfo@fcc.gov, I became aware that FCC does not have regulatory and enforcement jurisdiction to prevent a concoction of RF processing technologies to commit crime in civil society.
FCC-2018-000135	Suresh S. Kalkunte		11/21/2017	12/21/2017	Closed	This FOIA request is meant to understand efforts made by the Federal Communications Commission to advise the civilian law enforcement community such as the Department of Justice, Department of Homeland Security on the need for anticipating reuse of components emitting powerful unidirectional RF energy (high power Line of Sight Transmitter) for crime in civil society. Kindly make available a copy of document(s) that represent FCC's risk management efforts in this context. I am grateful to the Office of Engineering and Technology at the FCC who exercised intellectual honesty in the first week of June 2015 concerning my query on whether FCC has oversight on intentional misuse of powerful unidirectional RF transmitters used in the mobile/microwave communication backhaul infrastructure. In response via oelinfo@fcc.gov, I became aware that FCC does not have regulatory and enforcement jurisdiction to prevent a concoction of RF processing technologies to commit crime in civil society. Best Regards, Suresh Kalkunte

FCC-2018-000153	Taylor S. Amarel		11/24/2017	N/A	Closed	I would like to obtain all documents, memos, investigations, and research, shared with the FCC Commissioners pertaining to how repealing net neutrality could have a disparate impact on populations based off their race, color, national origin, etc. Specifically, according to the FCC's mission, specified in Section One of the Communications Act of 1934 and amended by the Telecommunications Act of 1996 (amendment to 47 U.S.C. sect151) is to "make available so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex, rapid, efficient, Nationwide, and world-wide wire and radio communication services with adequate facilities at reasonable charges." However, evidence would suggest and there is precedent that repealing net neutrality would have a disparate (and therefore illegal) impact on specific groups of people in a discriminatory manner. This precedent that certain policies that have a disproportional impact on certain individuals is illegal (see CFPB proceedings against banks who illegally discriminated based off ZIP code or other information that almost solely affected individuals of color). Given that it is written as a mandate of the FCC, there is significant reason to believe that the requested documents do exist, and if they don't, such research is required to avoid potentially illegal and discriminatory rule making by the FCC.
FCC-2018-000154	Carol a. Farnstrom		11/24/2017	12/26/2017	Closed	I would like to be acknowledged and given the information you have in reference to the 702 Fisa surveillance I have been under since early this year if not last year also since my identity was sold illegally and is being used as a mask by covert government operations relating to the uranium 1 deal. I know I was targeted and used as a science experiment by multiple agencies of the US Government since I was born in 1969 and I deserve answers and compensation. The Fbi seized all my evidence that gave them all their info about the scandal so someone in this government could at least start talking to me like i'm a human being instead of a lab animal under a microscope for the last 4 months via satellite imagaes and planes over my house every 15 min. I want answers and the longer this government waits to talk to me the less willing I am to be a citizen of this country and you can rest assured the securities that this government stole and kept from my family will go with me if I leave as I'm sure the EU will be happy to allow my citizenship there instead of the country that allowed this nuclear atrocity to happen to me. The FCC has greatly benefited from the 48 years of my existence in that my physical being has been used as an energy source and one big government science experiment. I want answers!

FCC-2018-000165	Monty M. Tayloe	Communications Daily	11/28/2017	01/12/2018	Closed	On behalf of my full-time employer Warren Communications News, an independent journalistic publisher of daily publications including Communications Daily, I seek from the FCC the following information: any and all communications and documents of any type between Commissioner Mignon Clyburn, her aide David Grossman, the Office of General Counsel, the Administrative Law Division and Ethics Official Patrick Carney regarding Grossman's recusal from FCC proceedings involving ATSC 3.0. I am seeking a list of any such communications, their dates and times, as well as their complete contents. Along with communications and documents about Grossman's recusal, I am also seeking communication and documents about the end of that recusal on Nov. 7, and the reasons for the recusal ending. I am also seeking documents and communications about any other proceedings Grossman was recused from in 2017. I contend that this information all must be released under the Freedom of Information Act, and that none of it is exempt from disclosure under any FOIA exemptions. Even if this information is not all contained in one place, or in one document, I contend that it must be released under FOIA because it is all information relating to a public FCC proceeding. Grossman's recusal was acknowledged in an email from Grossman to Communications Daily on Nov. 14 2017, and in a Nov. 13 NAB ex parte filing. Because publications including Communications Daily intend to use this information to write news articles, I request that the FCC communicate with me by email or phone, not U.S. mail, with any questions and updates. I request that I be informed as soon as the FCC determines what information it can provide in response to this FOIA request. I would prefer to receive information as it becomes available, not to wait until all information is available.

Wikipedia offers a concise definition of a "server log": A server log is a log file (or several files) automatically created and maintained by a server consisting of a list of activities it performed. A typical example is a web server log which maintains a history of page requests. The W3C maintains a standard format (the Common Log Format) for web server log files, but other proprietary formats exist. More recent entries are typically appended to the end of the file. Information about the request, including client IP address, request date/time, page requested, HTTP code, bytes served, user agent, and referrer are typically added. This data can be combined into a single file, or separated into distinct logs, such as an access log, error log, or referrer log. However, server logs typically do not collect user-specific information. Accordingly, the responsive records should include, at a minimum, the following for each filing cited above: • Client's IP address • HTTP request date/time • URL requested • HTTP code • Client's user-agent header • Client's referrer header The FCC website's privacy policy makes clear that the FCC's servers collect and record this information. 2 Any additional fields contained in the FCC's server logs should be included in the responsive records, as well. This request seeks only the server logs that correspond to the submissions of the 20 filings cited above.

FCC-2018-000243	George Brietgam		12/18/2017	02/20/2018	Closed	I am seeking information regarding the FCC's enforcement of 47 U.S. Code sect 508, a federal statute that makes it a crime for broadcasters to engage in conduct that materially alters the outcome of a bona fide contest of intellectual knowledge, intellectual skill, or chance. Specifically, I am looking for: (1) Any memos, policies, or guidance discussing the FCC's policy of enforcement of 47 USC 509 in general; (2) Any memos, policies, or guidance discussing the FCC's policy of enforcement of 47 USC 509 as the statute relates to reality television shows (such as Survivor, on CBS); and, (3) All documents connected to the FCC's investigation television shows suspected of violating 47 USC 509 from the year 2000 to the present. To give this request a little context, I am writing a law review article on 47 USC 509 and how that statute might apply to modern reality game shows when producers interfere with the outcome of the games. The purpose of this request is simply to see how, administratively, the FCC is currently interpreting 47 USC 509, and whether or not the FCC is applying this statute to modern reality game shows, and whether or not there has been any enforcement of this statute in recent years.

FCC-2018-000298	Henry J. Angelo		01/08/2018	02/06/2018	Closed	I had filed an informal complaint with the FCC regarding a fee for a "secured connection" being charged by Spectrum which is part of Charter Communications, Inc. On August 16, 2017, I was notified by email that my complaint had "been served..my carrier for its review and response." I received Ticket No. from the FCC. The FCC contacted Charter Communications twice on my behalf. I received a response from Charter Communication and even though my concern was not addressed and both responses did not answer the questions put forth, the FCC closed my complaint.I am trying to understand how the FCC works and how it "investigates" citizens' complaints. As such, under the Freedom of Information Act, I am requesting the following:Request No. 1. Documentation or policies detailing how citizen complaints are to be handled. That would include investigatory procedures, steps taken to answer complaints, who would review the work and who would sign off that the complaint had been answered.Request No. 2. Documentation or policies to aid FCC employees' understanding when or if a complaint had been properly answered, or if the responding company (which would be the recipient of such a complaint) had simply thrown together a response to placate the FCC. The case in point is that the second response I received from Charter Communications simply stated "we affirm our original response" (and that was after the FCC allowed a 2 week extension to allow Charter extra time). Request No. 3. Documentation or policies signifying who at the FCC makes the determination as to when or if a ticket/complaint is closed.

FCC-2018-000518	Jessica Van Parys		03/27/2018	04/25/2018	Closed	I'm interested in using the FCC's broadband penetration data collected on Form 477 for the years 2000-2017. I've downloaded the data from 2014-17 directly from the FCC's website: https://www.fcc.gov/general/broadband-deployment-data-fcc-form-477 However, I cannot find earlier versions of the data from 2000-2013 online. I am submitting this FOIA request for the data from 2000-2013. I am a health economist and would like to use this data in a research project. The research question is, How does internet access affect provider choice and health outcomes for Medicare beneficiaries? The hypothesis is that Medicare beneficiaries with internet access are able to choose higher quality doctors and hospitals, and they have better health outcomes as a result of receiving less low-value care. I'm working on a grant proposal that would link the FCC broadband penetration data at the Zip Code-level to Medicare claims data. Please let me know if you need more information.

I am requesting the report and any investigation or other action taken after submission of the report. I am still experiencing this form of terrorism. I am being attacked psychologically and experiencing subliminal threats through my new phone, a Samsung Galaxy 7. For example, I received a notification from a Facebook comment on someone's status that their dog had died and that they were very sorry for their loss. I cleared this notification but it continued to appear on my phone's screen even though I had turned off all Facebook notifications. That very evening my service dog became violently ill and I feared she would die. (retailation)

FCC-2018-000549	Jeff Friedrich	Slate Magazine	04/05/2018	05/04/2018	Closed	I would like a list of all fines that have been levied against operators of unlicensed radio stations (aka "pirate radio"), and for each fine I would like to know the amount of the fine, the date it was issued, the amount that has been paid to the government, the date of payment, and the current status of the enforcement action. I am thinking of a summary of enforcement actions that is similar to the one presented in the following link, but which also indicates the current status of each enforcement action: https://www.fcc.gov/reports-research/maps/fcc-enforcement-actions-against-pirate-radio-location/ If data is available, I would like it provided in a spreadsheet or text delimited file. I am also interested in any internal reports or communications concerning the Enforcement Bureau's ability or inability to successfully collect fines levied against unlicensed radio stations.

Therefore, Robeson respectfully requests that the FCC provide the requested records by April 17, 2018. FCC-2018-000581	R. James Valvo III	Cause of Action Institute	04/11/2018	05/09/2018	Closed	I write on behalf of Cause of Action Institute (CoA Institute), a nonprofit strategic oversight group committed to ensuring that government decision-making is open, honest, and fair. 1 In carrying out its mission, CoA Institute uses various investigative and legal tools to educate the public about the importance of government transparency and accountability. The Federal Records Act (FRA) was amended to codify a definition of electronic messages that includes electronic mail and other electronic messaging systems that are used for purposes of communicating between individuals. 44 U.S.C. 2911. Thus, electronic communications sent or received in the course of agency business, regardless of the method of message delivery, are federal records that should be properly captured, retained, and stored in a manner such that they can be searched and reproduced upon request. National Archives and Records Administration (NARA) Bulletin 2015-02 Guidance on Managing Electronic Messages, makes this clear. However, recent events call into question whether and how agencies are properly capturing, retaining, and storing electronic messages. Therefore, pursuant to the Freedom of Information Act (FOIA), 5 U.S.C. 552, CoA Institute hereby requests access to the following records: 1. All records regarding Federal Communications Commission policies on the retention, management, and/or administration of electronic (i.e., instant) messages, including but not limited to protocols such as SMS, MMS, Skype, Windows Messenger Service, XMPP, iMessage, Signal, BBM, etc. 2. All records regarding Federal Communications Commission policies on employee use of electronic (i.e., instant) messaging. 3. All records related to receipt, implementation, or compliance with NARABulletin 2015-02.

FCC-2018-000597	Michael Ravnitzky		04/18/2018	05/16/2018	Closed	Copy of each FCC Investigative report and each FCC enforcement action document associated with William M. FCC-2018-000599	Michael J. Marcus		04/18/2018	05/17/2018	Closed	FCC documents describing its procedures for approving requests for use of IMSI-catchers such as the Harris Stringray system (https://en.wikipedia.org/wiki/Stringray_phone_tracker) that are used for monitoring users with cell phones. These systems transmit in cellular bands licensed by FCC and which have exclusive NG allocations. This use of such system by a nonfederal entity other than a licensed cellular carrier would require an FCC license, waiver, or spectrum lease. Use by a federal entity would appear to require some FCC consideration under its MOU with NTIA (http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230835A2.pdf). Since at least one Stringray model has FCC equipment authorization (FCCID) it appears there is use by NG users. I also seek any information FCC has ever given to users or potential users of such devices on how to request FCC permission and how they can use the equipment consistent with FCC policies. I do not seek specific authorizations for use of such equipment with details such as user, date, location, or frequencies as I believe that such information is legitimately sensitive for law enforcement reasons. But I do seek information on the procedures used for such approvals and when and by what authority those procedures were adopted. I also seek information on how many approvals have been given each year for use of such equipment by both G and NG users. In view of the possible difficulty of this request, I agree in advance to a 30 day extension of the statutory due date

As you requested, this email is a formal request for any data or other information USAC is able to share with us in regards to the appeals process, including but not limited to: total number of appeals (FY2017 and historically), average length of time from appeal to decision; and any details in regards to those decisions (e.g. decision made; applicant type; etc). EducationSuperHighway is a non-profit advocacy organization that provides free tools and resources to E-rate applicants (specifically, public school districts and charters) to assist and encourage them to meet the FCC's long term bandwidth goals, to utilize their Category 2 E-rate budgets, and related missions. All of our work is based on public data from USAC and other sources as well as direct interaction with applicants and state partners. We feel strongly that our assistance to these applicants is most effective when we have a complete picture of the E-rate application process, which is why we are submitting this request. We do not have any specific outward-facing uses for appeals information planned at this time; this information is to be used for internal planning and analysis purposes. We would find it extremely valuable to have ongoing or recurring updates on this information if possible. Thank you very much for your assistance.

FCC-2018-000681	James DeWaesche III		05/25/2018	06/25/2018	Closed	I am seeking documents involving the victimized name, against all and any federal involvement with Government mind control, and all others unrelated to seek full disclosure of the acts of human cruelty that have been arbitrated on the family and families affected to this individual in accordance with constitutional law. The suspected time frames by which the person affected range from 06/01/1993 to present. My intention is to seek compensation for the personal injuries caused upon this individual to secure a financial security under the basis of operational negligence's and abuses of power by private and federal organizations alike that have brought on mental instability and long term incapacitation. Certain traits posed by the arbitrators onto the victim below. -Loss of motor functions and control -Total loss of cognitive ability to perform simple tasks -Heavy mood swings and complete loss of control of emotion - Visual and auditory induced thoughts of suicide and homicide -Genital stimulation -Paranoia There is reason to believe involvement at the national level. James Michael DeWaesche iii accounts for millions of repeated words and phrases directed towards insecurities, unfavorable behaviors, and degradation of cognitive abilities in order to experiment on the psychological conditions of everyday life. There is circumstantial evidence to believe there is a mass production of subliminal type propaganda, private and public, that are set to target and destroy the civil liberties and constitutional rights we as U.S. citizens were all sworn to be entitled by implementing militarized technologies developed by private contracts in order to develop a desired social structure.

FCC-2018-000685	Caroline Van Zile	Skadden, Arps, Slate, Meagher & Flom LLP	05/29/2018	06/27/2018	Closed	On March 23, 2016, the Federal Communications Commission (FCC) adopted an Order, which, among other things, revised its Emergency Alert System (EAS) regulations to establish certain reporting requirements applicable both to EAS Participants and to State Emergency Communications Committees (SECCs). See Final Order, In re Emergency Alert System, 31 FCC Red. 2414, 2415 ¶ 2 (2016). By November 6, 2017, EAS Participants were to report to their SECC certain information regarding actions taken or planned that would make EAS alert content available to its non-English speaking audiences in languages other than English. The rules then directed SECCs to provide, by May 4, 2018, summaries of information received from EAS Participants as an amendment to their State EAS Plans. As of today's date, that information has not been published by the FCC. We therefore request that the FCC produce the following: • All documents that refer or relate, in whole or in part, to SECCs' preparation and submission of summaries of reports filed by EAS Participants of their current or planned actions to provide EAS alert content in languages other than English to their non-English speaking audiences, as required by section 11.21(d) of the FCC's rules. Such information should include, but should not be limited to, correspondence regarding the SECC summaries as well as summaries that have been submitted to the FCC or its personnel. We respectfully request that, from this date forward, the FCC preserve any information that may be relevant to this FOIA request. Please search for and disclose records regardless of format, including paper records, electronic records, audiotapes, videotapes, photographs, data, and graphical materials.

FCC-2019-000085	Dr. Christopher Terry		11/13/2018	12/13/2018	Closed	Request for documents related to the time-table for 2018 Quadraennial Media Ownership Review. Under Section 202(h) of the 1996 Telecommunications Act, the FCC is required to review its media ownership rules every two (later modified) to four years. Reviews occurred in 2006, 2010, and 2014. These reviews were combined into an on going proceeding and a decision was released in August of 2016 after an order from the Third Circuit in April of 2016. The FCC also released a new minority ownership proposal (the incubator) in August of 2018. All of these actions were tied to remands of agency action by the 3rd Circuit in the prometheus radio project cases. Despite all of these actions, and the current date of November 13th, there appears to be no announcement that an ownership rule review (that is mandated by statute) for 2018 will begin during calendar 2018. Can you confirm that there will be no proceeding this year? If there will be a proceeding...will it begin in November or December? Is the agency just waiting until the case in front of the 3rd circuit is resolved? Please provide documents about the timetable for the launch of the review.

FCC-2019-000093	Dr. Miguel A. Gallardo (PhD)	www.cita.es/apedanica.pdf	11/19/2018	12/19/2018	Closed	Members and experts of APEDANICA detected a very serious shortfall in www.twitter.com that allows any individual to use any other account to report or complaining about any tweet. This means that anyone could use a fake identification and prompt Twitter to suspend any account. Twitter is already aware of this serious failure and massive SPOOFING from October 1th, 2018 at the latest, because of a public hearing held in Madrid within a civil suit at law, as we can document and detail in Spanish language. As far as we are concerned, the security issue has not been detected in any other language, hence it is very important to understand related tweets in Spanish. In Spain, any identity theft, illegal impersonation or use of an assumed name in fraudulent identification is a crime that the Prosecutor's Office must prosecute on its own initiative. APEDANICA is investigating any evidence while we ask Twitter for details and data at www.cita.es/requerimiento-twitter.pdf and www.miguelgallardo.es/nathalie-picquot-requerida.pdf APEDANICA asks to FCC, under FOIA, any and all information about the here-above shortfall, which is detected and suffered by many Spanish Twitter users. APEDANICA is very committed to offer all our collaboration to any concerned national authority, thus we wish to contact any official by email understanding both complaint and FOIA.

I am keen to know how many breaches of accuracy/impartiality/etc has been recorded by FCC for the whole period of TV channels existence and what was the outcome of every investigation - whether RT and/or RT America got any punishment (fine, sanctions/etc). Could you please disclose the information on the particular date of publication (broadcast) that was under investigation and the link on it; the name of the program (ex. Sputnik); the nature of the subject discussed (what was the program about? ex. Ukraine? NATO? EU? Syria?) what thoughts were/are considered as partial (quote if possible)? what was considered as inaccurate? what was the outcome/the penalties (a particular amount of money) paid by RT/RT America? I would like to get this data for closed investigations as well as for ongoing (the same questions except penalties paid, as it is obvious that they are not paid yet because those investigations are not finished). Comparing to other broadcasters is the number of investigations launched against RT and RT America unusual? What is the ratio?

FCC-2019-000146	Harris Contos		12/17/2018	1/17/2019	Closed	Resubmittal of request FCC-2019-000090 for "Do Not Call" complaints on phone no. which initially resulted in no records being found. The reasons for my request include the following: -I submitted several complaints to the FCC on 11/16/2018 for "Do Not Call" with the following ticket nos. be assigned, I believe covering the period September 2015 to October 2018: 2924906, 2924911, 2924932, 2924934, 2924937, 2924939, 2924944, and 2953331. -I would imagine that sufficient time would have elapsed for the database on complaints with the FCC would have updated in time for my FOIA request to be researched. I routinely file "Do Not Call" complaints with both the FTC and the FCC, and the former has informed they do have records and will be forwarding them to me. The website www.800notes.com, quite often used by people to list unwanted calls they have received, has three full pages, over 40 complaints, on phone no. . It has been my experience that many of the people who have been motivated to list complaints with this website have also done so with the FTC and the FCC, so my expectation would have been to see several complaints in addition to mine. I would appreciate your taking another look, as such complaints on file with both the FTC and the FCC can be valuable as evidence in civil litigation against telemarketers, scammers, and other violators of the "Do Not Call" law.

FCC-2019-000200	Miss Elizabeth N Pancotti	National Bureau of Economic Research	1/28/2019	2/27/2019	Closed	I am requesting unique IDs for residential broadband providers by tract and/or ZCTA for any and all years between 1999-2016. These can be de-identified (i.e., Provider X could be called 12345 and Provider Y could be called 54321), but the identifiers must be consistent across all available years. It would be ideal if these could be linked to the tract/ZCTAs from the Form 477 data that just gives numbers of providers. An ideal format would be one or more .csv or Excel files, where each row is a ZCTA/tract-year and all providers are listed (either in separate rows so that ZCTA/tract-years are repeated (a long format) or in separate columns for each row (a wide format)). We are using these data for academic research, and we need unique provider IDs to correctly allocate the number of providers to tracts when the data collection switched from ZCTA-level to tract-level.

Perhaps the FCC has records on file to confirm the confiscation or records of investigations into actual or suspected illegal activities. I am told that the Radio Intelligence Division of the FCC would be a likely area to check but please to not limit your check to one area.

I HAVE EVIDENCE THAT HE WAS MAKING DONATIONS TO JUDGES BEFORE I DIVORCED HIM. WHY WOULD A COMMON PERSON DO THAT OTHER THAN TO ELICIT FAVORS?? I STILL HAVE THE CANCELLED CHECKS. THE JUDGE IN MY DIVORCE WAS OUT OF CONTROL WITH HER ABUSE TO ME. LUCKILY SHE WAS REMOVED FROM THE BENCH & MY POST DIVORCE REASSIGNED TO A NORMAL JUDGE. THE CHAOS THEN SUBSIDED. THE OUT OF CONTROL JUDGE SOMEHOW GOT BACK ON THE BENCH BUT NEVER WOULD I HAVE TO REASSIGNED BY TO HER. WHAT HAS GONE ON RECENTLY IS THE GOOD JUDGE RETIRED & THE OUT OF CONTROL JUDGE NOW IS A CHIEF JUDGE. I HAVE 4 DAMNING HEARINGS ON THIS WOMAN WITH COMPLICIT JUDICIARY. & WITH THEIR COMPLICITY THEY HAVE ENABLED MY EX . WHAT THEY ARE NOT AWARE OF ARE ALL OF THE TIMES HE KEEPS TRYING TO KILL ME. IVE CHANGED ATTSYS SIMPLY CUZ THEY DEMAND PAYMENT BUT DO NOT GIVE ME REPRESENTATION SO AFTER 10 YEARS OF THIS ANYONE CAN SEE HOW THE COURT PROCEEDINGS HAVE BEEN MANIPULATED & SKEWED WHEREBY DOING FRAUD ON THE COURT BY THESE ATTSYS. THE MALIGNANT ONE IS THE OPPOSING ATTY WHO IS ALSO THE GRANDSON OF A CHICAGO MONSTER. A DANGEROUSLY CRIMINAL PERSON WHO HAS THE LEGAL EXPERTISE TO CIRCUMVENT THE LAW & CERTAINLY A REACH TO THIS OUT OF CONTROL JUDGE. HE TOO MAKES DONATIONS TO HER. ITS ALL ONLINE SO ANYONE CAN VIEW IT. WITH DONATION YOU GET FAVORS. SO WHEN THESE ATTSYS ORCHESTRATE COURT HEARINGS & THEY DONT KNOW ITS FOR THE PURPOSE OF THIS PSYCHOTIC EX HUSBAND TO INFLECT PAIN, THEY STILL GET ATTACHED TO HIS CRIMINALITY. SO ARE THERE ANY TYPE OF WIRETAPS OR DIGITAL SURVEILLANCE ATTACHED TO MY NAME.

FCC-2019-000346	Olivia King		3/29/2019	4/26/2019	Closed	Information about social media usage and television usage by peoples aged 10 to 50 from the year 2009 to the present (March 29, 2019). I am more specifically looking for: percentages of how many hours per day people from each age spend watching television and how many hours a day are spent on social media usage; the most common hours for watching television by each age; most common hours for social media usage by each age; which social media is used most by each age; what television channels are most watched by each age; common commercials on television at the hours most watched; the presence of television ads for Hydroxyout or other dietary supplement commercials; customer demographics of dietary supplements (like Fit Tea or Flat Tummy Tea) that heavily rely on Instagram for advertisements. It is my goal to discover how Instagram and Instagram influencers are changing the market for fad dieting. I would like to find out if Instagram influencers have made younger people more likely to buy dietary supplements. For example, if Hydroxyout aired commercials later at night on more adult geared television channels, it would indicate to me that Hydroxyout is aimed at adults. Compared to if younger people who are using Instagram are being influenced by influencers to buy dietary supplements like Fit Tea, Flat Tummy Tea, and more. I am essentially looking for information on the customer demographics of people buying dietary supplements in 2009 (where it was more likely to be advertised on TV, for adults) versus now (where Instagram ads with influential young people are used to persuade other young people). I previously requested this information from the Department of Justice and was referred to the Federal Communications Commission Agency in their response letter.

FCC-2019-000427	Mr. Matthew Knowles		5/8/2019	6/7/2019	Closed	First, some background. In 1967, the FCC began working with AT&T to establish a nationwide telephone number for reporting emergencies, which eventually became 911. Then, in 1973, the White House issued a policy statement calling for the expedition of this process. Shortly afterward, the 911 system entered rapid expansion across the country with the help of the federal government. In regard to this expansion, I seek the dates that each location in the United States (state, county, city, etc.) first adopted the 911 system. Alternatively, if the FCC is not in possession of this information, I would be happy to learn who might be so I may pursue it with them.

FCC-2019-000524	Mr. Theodore White-Meridian		6/20/2019	7/24/2019	Closed	Many years ago, in connection with a pending divorce trial, I issued subpoenas to a number of telecommunications companies, the purposes of these subpoenas was to request records that were relevant to a pending action. Following these subpoenas, to ATT, Sprint, T-Mobile, Verizon, things gradually changed in a worse direction, I was feeling constantly tired and later on I became one of the first victims of NSF Facebook sponsored emotional States manipulation studies. All of that was in 2011. However, the symptoms continued and upon painstaking investigations, I am of the view that one or more cell phone company security is targeting as retaliation for the aforementioned subpoenas. Does the FCC maintain any records about security protocols or policies or human subjects protections or human protections from unlawful cell phone security targeting? My investigations revealed that at least cell phones were used as a targeting GPS location. Some damages caused included sleep deprivation, depression, anxieties, and enormous financial harm. I am trying to investigate the sources where the assaulting signals originate for purposes of litigation. There is no doubt that neuroscientists are researching using cellular technologies, including visual neuroscientists, auditory neuroscientists and all others. It is also apparent that the targeting is even during driving with eye movements tracking and other similar offensive violations of civil rights. The information will be used for purposes of litigation. The offensive targeting also included tapping on the walls in the high rise apartment buildings, but tapping as a word does not capture the extent of damage, it was more like Star Trek/Star War era laser gun shots almost ever five minutes in my apartment since 2009. I believe these are cellular radio signals that create the auditory feedback, it is not a brain stem response, although I was not able to locate the source.

The reason for this request is based on me Willie E. Polite, as a prisoner being unable to receive One (1) Digital Signal and/or Air Channel, the only way I am able to receive and watch TV, is by me paying for cable other than that I would not be able to watch television at all. I pay \$17.00 dollars a month for cable and cant switch from cable to Digital and/or Air channels, which is forcing me to pay for cable because I am unable to receive any other channels. The information I am requesting is important and I need copies of this information. Do the Department of Correction have a distributors license to sell cable to inmate/prisoners? And how many channels is the Department of Corrections receiving from their cable provider? And how much is the Department of Corrections paying monthly to their cable provider? And what cable company provider is the Department of Corrections contracting with? And I need a copy of the contract. Enclosing this brief request, I pray that I dont receive any retaliation from the Department of Corrections and/or its agents of the Commonwealth of Pennsylvania, for making this request of information from your Department/Office.

This includes internal and externally generated complaints, emails, phone calls/voicemails, trouble tickets and the like. This FOIA request would include user/public/official/FCC issues with ECFS, EDOCS, fcc.gov/live and other public-facing databases. I seek copies of all communications, correspondence, trouble tickets and the like related to any such complaints, issues, experiences, reports and the like. We seek documentation/data showing the extent of which these issues have been reported, when they were reported, by whom they were reported and what caused the problem or is thought to have potentially caused the problem. We also seek information showing the current status of/resolution of the issue as it stands as of today. I request you search all electronic and paper-based records systems and databases for these materials and provide any/all of these records in electronic format if possible. I also request a cross-reference search. I specifically request that you include so-called "non-responsive" material per the Court of Appeals for the District of Columbia Circuit in American Immigration Lawyers Association v. EOIR, 830 F.3d 667 (D.C. Cir. 2016) which found that FOIA does not provide for . . . redacting non-exempt information within responsive records. As declared by the court, once an agency identifies a record it deems responsive to a FOIA request, the statute compels disclosure of the responsive record "i.e., as a unit "except insofar as the agency may redact information falling within a statutory exemption. Also, under FOIA Improvement Act of 2016, each agency, in accordance with published rules, shall make available for public inspection in an electronic format . . . copies of all records, regardless of form or format . . . that have been requested 3 or more times." This clause is within (a)(2), which has no provision whatsoever for fees. The statute explicitly says "requested", not "provided." If my request is rejected, I will file two additional requests so that it will meet the requirements of the statute.
