# Carcassonne Snakes & Ladders

Carcassonne meets Snakes & Ladders.  
This mini-expansion combines two classic  
games and changes the dynamics of  
scoring in a whole new way.

## Components

1 Snakes & Ladders-Scoreboard

## Setup

Use the Snakes & Ladders-scoreboard instead of the usual one. Then, as usual, you place a meeple from each player on field 0.

*This expansion was developed for the Carcassonne base game, therefore the basic rules stay the same!*

*You can play Snakes and Ladders in combination with other expansions but there won't be any official rules.*

## Gameplay

This expansion does **not** change the regular gameplay.

Follow the steps as usual **1. Place a land tile**, **2. Place a meeple** and **3. Score points**.

## 3. Score points

As in the basic game, you count the points you collect in the game on this scoreboard. However, there are some special fields where the scoring meeples are moved.

- On fields **1, 16 and 32** is a **bottom of a ladder**. This is marked by a person.
- On the fields **13, 31, 39 and 48** is the **head of a snake**.

After you have scored everything, you look on the scoreboard where the scoring meeples are.

- If a scoring meeple is at the **bottom of a ladder**, it climbs "up" and is now at the end of the ladder.
- If a scoring meeple is at a **snake's head**, it is "eaten" and moves to the end of the snake's tail.

You are on 16. Your scoring meeple climbs "up" the ladder. Now it is at field 34.

Blue is on 39 and is "eaten" by the snake. You move the scoring meeple back to field 11.

Green is on field 27. Nothing happens on this field, so the scoring meeple simply stays there.

## FINAL SCORING

At the end of the game, do the final scoring as usual. Ignore all snakes and ladders.
